

SERVICES

Industrial Hygiene (IH)
Soil Vapor Intrusion
Indoor Air Quality (IAQ)
STEL Monitoring/TWA Monitoring
Area Monitoring
Research & Development
TO-1, TO-2, TO-12, TO-14 & TO-15 Analysis
BTEX Analysis
Formaldehyde Analysis
Ethylene Oxide Analysis
Beverage Testing
Environmental screening of surface soils
PAMS (Photochemical Analysis Monitoring System)
Product off-gassing
Headspace VOC's
Landfill monitoring
Emergency Response

NYS DOH Certified
Certificate No. 11830

PRODUCT SERVICE INFORMATION

COMPLETE SOLUTIONS
FOR VOLATILE
SAMPLING AND
ANALYSIS

CEN TEK LABORATORIES, LLC

Centek Laboratories, LLC's investment in superior instrumentation, advanced technology and its professional team provides unbeatable service. Using EPA, NIOSH and OSHA methods for compliance. Centek Laboratories analyzes samples from a variety of sources including Industrial Hygiene, Indoor Air Quality, Product Off-Gassing, Headspace VOC's, and Environmental Screening. Centek Laboratories, LLC prides itself on building loyalty through providing the best possible service.

SERVICE...

It's what we must continue to do better than anyone else. Outstanding *service* and *fair pricing* will help us provide choice, our primary objective.

SAMPLING...

Choosing the correct methods, techniques and analysis are vital to the success of any air sampling program. Centek Laboratories can simplify your air sampling program utilizing Silonite coated canisters. This eliminates the absorption, contamination, and low recovery problems associated with tubes and Tedlar bags. Through this process we eliminate the need to make volume measurements in the field dramatically reducing the time, labor and level of experience needed to collect samples properly.

ANALYSIS...

Whole air samples are analyzed with state-of-the-art cryo-focusing and advanced GC/MS technology. The samples are in-theory frozen and quickly injected for maximum resolution. This analytical process allows for sub parts per billion (ppb) detection limits. Our automation and data processing power are key elements for providing a **5 business day turn-around time** and maintaining pace with growing sample workloads.

No matter where you are located we can provide the perfect service solutions for all your analytical needs.

REPORTING...

Our Laboratory Information Management System (LIMS) has been designed and developed by chemists and project managers working in a commercial analytical laboratory specializing in VOC analysis with fast efficient, accurate and immediate results being key. Our LIMS capabilities include: Automated data

entry; automated data validation; Electronic data deliverables; Web access to lab results and historical data charting.
